# DFIT

## Diesel Fuel Injector Tester

# HOW MUCH IS YOUR TIME WORTH?

- ✓ **15 minutes test time!**
  - Significant time saving equals fast ROI
  - Eliminate time intensive diagnostic procedures
- ✓ **Connects to PCM harness**
  - No engine disassembly
- ✓ **Menu driven test procedures**
  - Complete fuel system diagnosis
- ✓ **6.6L Duramax Diesel Engines**
  - 2001-2010 model year coverage

Watch the demo video

Why take the time to perform a beaker test if you don't have to? DFIT connects directly into the PCM harness, eliminating time consuming engine disassembly and should be your first step in any Duramax fuel system diagnostics.

The menu driven test procedure takes minutes to perform; providing a complete analysis of the high pressure pump (regulator), cranking system, system return flow, fuel injectors electrically under load and flow per cylinder.

### Tests:

-High-pressure Pump (Regulator)  
-Cranking System

-Total Return Flow  
-Injectors Electrical/Flow
